# Engagement

## Use various forms of Communication forms:

"In the high business competitive world, customer support and engagement matter a lot since it builds trust nurtures strong relationships with customers and clients and provides a company a face with a voice."

**Live Chat:** It is the best way to meet and talk with customers "face to face" without traveling. However, we use Skype in conjunction with a phone call that makes sure that we cannot lose audio even if we lose the video.

**Open Ticket:** For any kind of support, customers and clients can click on our open ticket and send us with complete information. we provide immediate response between 30 min to 48 hours.

**Email:** We email when our clients are able to talk with us and allow the customer to respond on their time

**Phone:** We use phones when we need to talk on or handle sensitive concerns so that we can clearly and directly communicate with clients

**Social Forums:** We also to communicate with a client through social media. Social sites such as Face book, Twitter, etc, are best for pushing out information that clients can choose to read or just simply ignore.

It Completely depends on you that which communication ways work for you

## Support Customers all the way:

We support our customers whenever they need it. Everyone is busy today, and it has become very easy for business relationships to lose color. Therefore, we provide weekly or monthly work report (related to client project), informed client about what is going on its project, live video chatting on the projects ans many more.

# Portfolio

The best way to demonstrate our expertise is to show you our work. In our portfolio section you may find some selected projects from our growing list of web & mobile application development, to give you a better idea about our experience and expertise

# Quality Management

The Project Quality Flow processes of TVSR Technologies include all the activities that determine quality objectives, responsibilities and policies so that the project will satisfy the need of the customers and client or for which the project was undertaken by us.

## Our Project Quality Flow or Management Process Includes the following things

**Project Strategy:** In this part, we outline the project business requirements and then propose the appropriate methodology or approach, which we require to use to deal with it, Now we identify which quality standards are significant to the project.

**Build Quality Criteria / Standards:** We clearly define as well as communicate the quality objectives or approaches to our project team for making sure that a successful project ending

**Quality Objectives or Targets:** TVSR Technologies Quality objectives meet customer requirements as well as are measurable. We identify targets agreed upon by the customer and clients.

**Quality Assurance:** We apply the planned and methodical or methodical quality activities, which make sure that the client project uses all processes required to meet all its requirements.

**Quality Control:** Our team monitors specific project results to find out whether they fulfill with appropriate quality values, and also identify proper ways to eradicate the sources of disappointing performance.

**Project Closure Report:** After making sure that the project is ready to deliver, then we make Project Closure Report, which offers confirmation that the standard criteria for the project deliverables have been met up that are agreed upon by customer. we identify which quality standards are significant to the project.

# Mobile Web Development

## Why The Demands Of Responsive Website Design Increasing?

A Business that do not have the mobile version for their sites are turning away a large percentage of their customers or visitors. there are more than 1.2 billion (It is forecasted that there will be more than 1.7 by 2013) billion mobile web users across the

between 22-26% mobile users are only the United States that never used or touched their desktop or computer in this year. The overall percentage of people in United State, Which access websites from their mobile device, is 63% therefore, with these kinds of figures, it is really very imperative for business owners, online stores or individual that design or develop a mobile responsive website.

## Why Choose TVSR Technologies

For bringing online business across billions of mobile users, you require a response or mobile version website, then we, TVSR Technologies, a website designing, including responsive design company can help you immensely. Mobile websites are our passion and we have the team of experts, which can design unique, beautiful and appealing mobile friendly website design that will meet your business prerequisites.

## HTML 5.0 Website Designing

We use HTML 5 that is the latest version of HTML (Hyper Text Mark-up Language) and features differently and accepts particular tags as well as needs strict coding. HTML 5 is already coming in various gadgets or devices, including iPod, mac, and Apple iPhone, then why not a website. It has several unique elements that make a website wonderful and mobile user-friendly. we use several languages such as ASP.NET, PHP, XHTML, etc. that acts as a backbone for designing mobile version website. Some of the major unique elements of HTML5 are:

- Industry Leading SEO Services
- Video and Audio
- Local Storage
- Local SQL Database
- Web Applications
- 2D and 3D Graphics

Our expert team makes the best use of these elements of HTML5 in making responsive website
